QUICK FACTS

Construction Cost: \$10,285, 206
Square Footage: 43,000 SF
Start Date: January 2017
Completion Date: February 2018

PROJECT OVERVIEW

Valero's new office building is being constructed adjacent to the Meraux refinery plant area. The new 2-story, 43,000 SF facility will consolidate the plant's administration operations, which are currently spread throughout several buildings and locations.

Programmatic functions include:

- Offices and workstations
- Conference and meeting rooms
- Fitness center
- Wellness clinic
- Storage areas
- Voice, data, and security control room
- Miscellaneous support spaces

Offices surround the perimeter with open workstations in the middle, with circulation throughout. Vertical circulation consists of two sets of stairs and one hole-less hydraulic elevator.

Valero is the world's largest independent petroleum refiner, and a leading marketer, ethanol producer, and corporate citizen.

The project was designed by WDG Architects | Engineers in New Orleans, LA.
